

**FEEDBACK TO CALLING COMMUNICATION DEVICE ON CALL CONNECTED
WITH INTELLIGENT NETWORK SIGNALING****ABSTRACT**

An apparatus in one example comprises one or more intelligent network platforms
5 that serve to provide feedback to be played to a calling communication device during a call
from the calling communication device for a called communication device. One or more of
the one or more intelligent network platforms allow a user of the called communication
device to preselect one or more portions of the feedback. One or more of the one or more
intelligent network platforms employ signaling to connect the call from the calling
10 communication device to an intelligent network platform of the one or more intelligent
network platforms.
